Instructions for Laboratory Rotation Proposal

Please submit a one-page rotation proposal, preferably in PDF format. Use one page immediately following this cover sheet.

This should be written entirely by you, and generated after consultation with your laboratory rotation supervisor. Keep strictly to the 1-page limit, including any necessary figures and references (that's part of the learning outcome of each rotation: making a succinct proposal for research). You have three weeks to submit, until the end of the first calendar month of term. Extensions may be granted if you change rotation lab (with permission, using the form "Request to Change Lab Rotation" available on the Graduate School website) or if you start term late due to absence from OIST.

Specific training requirements provided by non-faculty member

It is expected that the primary supervisor is the faculty member in charge of the research unit. In special circumstances, direct supervision by another member of the unit may be permitted (e.g. training in a method by a postdoc or technician in the laboratory). Such supervision must be described and acknowledged in advance where possible.

- Name of provider
- Description of training provided

Training or Health Check needed

special resources, fieldwork, or business travel

Describe those on a separate page
